Tips for Staying On Track

Staying on track through your working years.

Saving for retirement can seem challenging at times, especially with competing priorities. But it's important to know where you stand. Use the grid on the right as a general rule on the amount you should have saved based on your current age.

Age	Savings Target
30	1/2 Your Salary
35	1x Your Salary
40	2x Your Salary
45	4x Your Salary
50	6x Your Salary

Not quite there? Don't panic! Saving more now can help.

That's right! Increasing your contribution rate today can significantly boost the amount you'll have at retirement. Every little bit counts.

This report is for illustrative purposes only and is not a comprehensive review of your progress towards retirement. All projections are shown in today's dollars. The information provided is not investment advice or financial advice. Risk, fluctuations in the financial markets, and other factors involved in all investments may cause your account to decline in value. The projected retirement savings are calculated using a time value of money formula compounded from current year until the year of the participant's projected retirement. This report includes assumptions to calculate the projected account balances which may change over time. These include an annual inflation assumption of 3.22%, employee and employer (if applicable) contributions that will continue until retirement, and the historical 10 year performance of each funds benchmark will remain consistent until you retire, (if applicable) a rate of return assumption of 5% is used for funds in self-directed brokerage accounts. These projections assume the reinvestment of dividends and interest and are shown gross of any fees.
